Education

Vishwakarma Institute of Information Technology, Pune

Jan 2022 – May 2025

B.Tech in Artificial Intelligence and Data Science

- CGPA: 8.78 / 10.00
- **Coursework:** Data Structures and Algorithms, Machine Learning, Cloud Computing, Statistics, NLP, DBMS

Saint Mai Junior College, Pune

July 2019 – April 2021

Higher Secondary Certificate

- Percentage: 89.1%

Work Experience

Full Stack AI Engineer – TÜV SÜD

Dec 2025 – Current

- Designed and developed AI-powered enterprise applications using Azure AI Foundry Document Intelligence, and agentic AI workflows.
- Designed and developed the complete frontend and AI Chat Feature of an enterprise AI application using React and TypeScript, integrating with .NET REST APIs as well.

Data Analyst Intern – TÜV SÜD

June 2025 – Nov 2025

- Collected, cleaned, and analyzed large datasets to build dashboards, Generated actionable insights using Power BI.
- Built a cross-platform AI desktop chatbot using Electron, React (TypeScript), and FastAPI, integrating Gemini through LangChain for conversational AI.

Software Engineer Intern – Mphasis

Feb 2025 – May 2025

- Built and maintained full-stack web applications using Java Spring Boot and Angular.
- Developed RESTful APIs, implemented MySQL database operations, and resolved integration issues across the application stack.

Projects

Alzheimer's disease detection at Early Stage using CNN

Github

Python, Custom CNN architecture, VGG19 Model, TensorFlow

- Early detection of Alzheimer's disease using MRI images for severity classification.
- Designed a deep learning pipeline for MRI preprocessing, data augmentation, and classification.
- Custom CNN achieved 92% accuracy, surpassing VGG19's 83% accuracy.

Multimodal PDF Chat Application

GitHub

Clerk, Gemini API, Pinecone DB, AWS SDK, OpenAI API, Next.js, React, TypeScript

- Developed a chat application with PDF upload and AI-powered responses using the OpenAI API.
- Used Next.js and React for frontend development, incorporating Tailwind CSS for responsive design.
- Utilized Pinecone for vector embeddings and optimized AI responses using OpenAI Edge

Text-to-SQL Application

Live

Python, Streamlit, Groq API, SQLite, LangChain, Pandas

- Developed a natural language to SQL query application that allows users to interact with databases.
- Integrated Groq API with multiple LLM models (e.g., llama3-8b-8192, mixtral-8x7b-32768).

Professional Certifications

Google Data Analytics - Coursera

Nov 2024

CCNA- Introduction to Networks

May 2023

Skills

Programming Languages and Tech: Python, SQL, React, JS, Machine Learning, Deep learning, GenAI, DBMS

Frameworks and Libraries: Langchain, Scikit-learn, Tensorflow Keras, Streamlit, Flask, Azure AI Foundry

Development tools: PowerBI, Git, VS Code, Google Collab, Jupyter Notebooks

Volunteer Experience

National Service Scheme (NSS VIIT): Unnat Bharat Abhiyaan Incharge

- Managed and Volunteered in Social Activities like Blood Donation, Awareness Campaign, Tree Plantation

Training and Placement Cell VIIT: Department Head coordinator of AI and DS

- Volunteered in managing drive for Campus placements and helping students with concerns regarding Placements
